## Announcement of the Starting of Sale of LED Lighting Products in Thailand

Okaya & Co., Ltd. (head office located in Nagoya City, Aichi Prefecture) will sell LED lighting products manufactured and sold by T-NET JAPAN Co., Ltd. (head office located in Takamatsu City, Kagawa Prefecture) in Thailand.

“New Venus” series of LED lighting products was developed, manufactured and sold by T-NET JAPAN Co., Ltd. in Japan for the purpose of saving energy on high ceiling lighting such as in factories and warehouses, having a high market share in high ceiling lighting.

This time, foreseeing the expansion of the high-brightness LED lighting market in Thailand and peripheral markets and the synergy effect with the roof business in South East Asia by Okaya & Co., Ltd., both companies will cooperate and advance the market exploration.

(The photos can also be sent to you as files.)

We will exhibit this product at “LED EXPO THAILAND 2014”, which will be held in Bangkok, Thailand from May 22-24.

We are scheduled to do market research and the preparation of products within this year and to start sales from January 2015.
